

USE CASE ANALYSIS

AdPushup's AMP Solution Increased Ad Revenue of a Media Publisher by 202%

The Goal

To improve ad revenue of a publisher with AMP inventory. The website gets a good amount of pageviews on news articles and celebrity updates shared via AMP pages.

The Approach

- Added AMP HTML ad units to deliver ads on AMP pages
- Set up real-time config solution (RTC) to enable header bidding and auction out inventory to more number of buyers
- Tapped into the demand pool of our partners (such as Index Exchange) who were available to buy AMP inventory
- Optimized layout by A/B testing ad placements for better revenue

The Result

202% ↑
AMP Ad Revenue

30% ↑
Click-through Rate

160% ↑
Viewable Impressions

ABOUT ADPUSHUP

AdPushup is a revenue optimization platform that helps publishers increase their ad revenue using automated A/B testing, header bidding, innovative ad formats, and adblock recovery.
